Subject: Yucca Mountain

Part of Records Package / Supplement / Correction

---

Simply put, I don't think there is any parent who wants a nuclear waste dump so close to the place where they live and where they are raising their families. If that is not enough, it has made perfectly clear that the trucks hauling this nuclear waste will come right through our communities, near schools, homes, churches, etc. I do not think there is anyone who can honestly guarantee that there will be no threat to the health of any persons within so many miles of these trucks.

I wholeheartedly OPPOSE the Yucca Mountain project. I believe there have to be other places in the United States that are far more rural and out of the way -- far away from populated areas such as Las Vegas, to consider a permanent nuclear waste dump. I do not believe the so-called "studies" showing that a waste dump at Yucca Mountain would pose no hazard to the population of the Las Vegas Valley and outlying communities. I believe that these people will say anything to get this project approved. Look what the cigarette companies said and did before they were "found out."

I urge you to RECONSIDER this project and consider OTHER options.
